

SAIL closing in on NMDC's iron ore capacity

By **ANIL KUMAR GUPTA** & **ANAND KUMAR**
Special Correspondents

The gradual increase of steel production in India's second largest state has brought the capacity utilisation of SAIL to the current 70%. There have been production peaks, which, however, do not seem to have been sustained. The state government has to take steps to ensure that the capacity utilisation remains at least 70%.

In 1987-88, SAIL's production was 10.5 million tonnes, compared to 10.2 million tonnes in 1986-87. The increase in production was due to the increase in the capacity utilisation of the state government. The state government has to take steps to ensure that the capacity utilisation remains at least 70%.

The state government has to take steps to ensure that the capacity utilisation remains at least 70%.
