

Message from Chairman, TRF Ltd on the launch of Vision 2013 (English)

April 1, 2008

Dear colleague,

The year just passed, has been one of consolidation and rebuilding of the top team in our company. It also saw the successful implementation of a diversification project in Singapore. I am quite sure that these positive steps would be the stepping-stones for a sound future for our company.

Our Government is quite correctly paying a lot of attention to the development of infrastructure without which our country cannot make further progress in the manufacturing and agricultural arenas. This bodes well for the business of our company which is well geared towards participating in the drive for improved infrastructure. We should carve out for ourselves a distinct position in the infrastructure space - both with regard to projects that we are executing and supply of important components, such as cranes, which go into this space.

We have taken some bold steps during the year just passed, and on the successful implementation of these steps, we will move ahead every further with our investments. I am quite sure that each and every one of you will contribute to the rejuvenation of our company space which has opened up through the development processes unleashed in our country. At the same time, we have to be aware of the type of opportunities abroad, which we have seized in a small way through the YORK venture in Singapore.

I wish you and your family a very happy and successful year ahead.

(Jamshed J Irani)
